

Real Results

Torque-limited Simple Pendulum

BSc Federico Girlanda

DFKI Robotics Innovation Center Bremen

Noisy Dynamics

Disturbance amplitude: 2 Nm

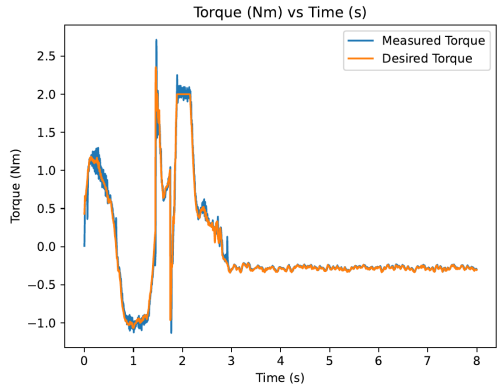

Noisy Dynamics

●●○○○○○

Different Initial Conditions

○○○○

- Initial condition for TVLQR control:
 $x = [0, 0]$
- Disturbance action:
 $t \in [1.5, 1.7]$
- Result swing-up: Successful

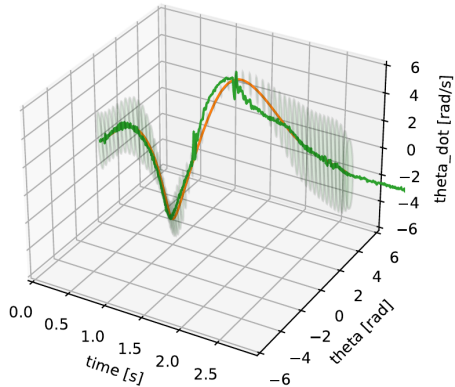

Real Results

Federico Girlanda, Torque-limited Simple Pendulum, July, 28th 2022

Slide 2 of 10

3d resulting Funnel

Disturbance amplitude: 2 Nm

Slide 4 of 10

- Initial condition for TVLQR control:
 $x = [0, 0]$
- Disturbance action:
 $t \in [1.5, 1.7]$
- Result swing-up: Failure
 $x_f = [2.1, 5.5e-03]$

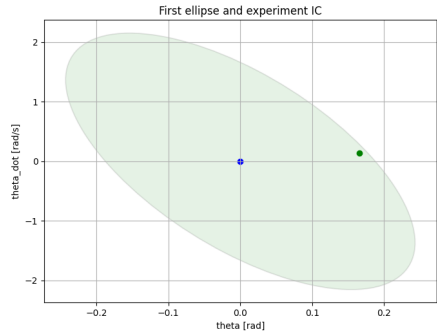

3d resulting Funnel

Different Initial Conditions

- Initial condition for TVLQR control:
 $x = [1.7\text{e-}01, 3.2\text{e-}01]$
- Disturbance action:
None
- Result swing-up: Successful

3d resulting Funnel
